EDUCATION

Prathyusha Engineering College, Anna University Chennai, India
B.Tech in Artificial Intelligence & Data Science; GPA: 8.14/10 April 2026

Courses: Machine Learning, Deep Learning, Natural Language Processing, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering

SKILLS SUMMARY

Programming:	Python, SQL, JavaScript
Data Engineering:	ETL Pipelines, Data Processing, Data Validation, Workflow Automation, JSON, API Integration
Backend Engineering:	FastAPI, Flask, Django, REST APIs, JWT Authentication, Microservices, Postman
AI & Machine Learning:	PyTorch, scikit-learn, Pandas, NumPy, spaCy, NLP
Databases & Cloud:	PostgreSQL, MongoDB, Docker, Git, GCP, Cloud Deployment
Generative AI:	LangChain, OpenAI API, RAG, AI Agents, Prompt Engineering, Embeddings, Semantic Search

EXPERIENCE

Vijetha Softwares Pvt. Ltd. Remote
Software Engineer Intern Aug 2025 - Jan 2026

- **ETL Pipelines:** Designed Python ETL pipelines for JSON data ingestion, validation, and transformation, processing **90K+** records/day while reducing data-quality failures by **33%**.
- **Workflow Automation:** Automated Python validation and API-driven workflows, reducing manual effort by **20%** and saving **15 hours/week**.
- **Collaboration:** Contributed to Git-based code reviews, Agile development, and technical documentation, reducing recurring production incidents by **24%**.

RoFabs.co Remote
Backend Engineer Intern Dec 2024 - Mar 2025

- **Database Optimization:** Optimized PostgreSQL queries, indexing, and schema design, improving dashboard response time by **30%**.
- **REST API Development:** Built FastAPI and Flask REST APIs serving **10K+ requests/day**, integrating third-party JSON APIs with validation and monitoring.
- **Testing & Architecture:** Performed API testing with Postman, increased backend test coverage to **60%**, and contributed to Git-based architecture improvements.

PROJECTS

Smart Task Management System — AI-automated task workflow 🔄 June 2026 - Ongoing
React.js, Node.js, MongoDB, Django, LLM APIs

- **Full-Stack Development:** Developed a full-stack task management platform integrating LLM and NLP services to auto-classify and prioritize 50+ tasks/day with 88% classification accuracy.
- **Backend Architecture:** Designed REST APIs supporting JWT authentication, JSON data exchange, task orchestration, and 150+ concurrent users.
- **Security & Reliability:** Implemented JWT-based authentication, role-based access control, and end-to-end tests achieving 75% coverage for secure, scalable collaboration.

CMT AI Data Pipeline — Automated collection and validation 🔄 August 2025
Python, PostgreSQL, Selenium, Pandas, Docker

- **Data Pipeline Automation:** Built a Python ETL pipeline for collecting, validating, transforming, and processing JSON and tabular datasets, reducing manual effort by **60%**.
- **Preprocessing & Storage:** Implemented preprocessing, schema validation, automated quality checks, and PostgreSQL-backed storage, detecting **95%** of invalid records.
- **Deployment & Monitoring:** Containerized pipeline components using Docker, cutting deployment time from 45 minutes to 10 minutes and improving operational reliability.

Hotel CV REST API — Production-style booking API with 80% test coverage 🔄 December 2024
FastAPI, Python, PostgreSQL, REST APIs

- **API Development:** Developed FastAPI REST APIs supporting secure JSON request handling, PostgreSQL integration, and validation across 12+ endpoints.
- **Reliability Engineering:** Implemented transaction management and exception handling, reducing unhandled errors by 80% through targeted testing and debugging.
- **Documentation:** Documented API endpoints and backend workflows with Postman testing, reducing onboarding time by **30%**.

CERTIFICATIONS & ACHIEVEMENTS

LangChain & Vector Databases in Production — Activeloop (2024)
Python Programming — Infosys SpringBoard (2024)
Joy of Computing with Python — Elite Rank Holder / NPTEL Swayam (2024)
LeetCode Problem Solving: Solved 150+ algorithmic and SQL problems covering arrays, graphs, dynamic programming, and advanced SQL optimization.
